WORK EXPERIENCE

INTENTIAL

Senior Software Engineer (Front End)

January 2023 – May 2023 | Atlanta, GA (Remote)

- Team A: Led a 4-month long project to upgrade local UI dependencies, adding new features and resolving bugs using React, Emotion CSS and JavaScript.
- Team B: Led, Planned, Architected, and Developed a new project from scratch, collaborating with backend, design, and managers teams using React, SCSS, and Typescript for the Frontend.
- Demonstrated strong frontend development skills through project leadership and development in both A and B teams.

Software Engineer (Front End)

November 2021 – January 2023 | Atlanta, GA (Remote)

- Utilizing cutting-edge front-end technologies like HTML5, CSS3, and JavaScript frameworks, we developed and deployed responsive and user-friendly web interfaces that improved user experience and boosted website speed.
- Ensured seamless integration of front-end elements with back-end systems by working closely with cross-functional teams, including designers and back-end developers, to transform wireframes and mockups into fully functional and aesthetically pleasing websites.

MINORITY PROGRAMMERS' ASSOCIATION (MPA)

Front End Engineer (Contract)

April 2021 – July 2021 | Washington D.C. (Remote)

- Working in a team of Designers, Frond End and Back End Developers, Developing and Prototyping Projects in React/Next.js
